CARBON TRADING CO.

BUILDING SITE OF COMMUNITY HALL

The Carbon Elks Lodge is sponsoring the erection of an Elks Community Hall in Carbon and the question of choosing a suitable site came up at the last meeting. There are several sites available, namely, one between the Hotel and the Municipal Hall; one on the corner opposite Nash's store just north of the old post office; and another on the corner south of Peters store. The price asked for the latter site is so prohibitive that this location is practically eliminated, while the other two sites are so nearly gratis that price does not enter into the matter of making the choice.

As this hall is to be erected for the benefit of the town and district community in general and as the Elks Lodge will be looking to the support of the community in their undertaking, it was decided to leave the question of choosing a site over to the first meeting in February in order to give all persons interested any opportunity to voice his or her opinion in this important matter of choosing a location for a community hall in our town.

It might be mentioned here that definite arrangements for the hall have not yet been decided on, but it is proposed to erect a brick building at least 100x40 feet, with full size basement, to cost in the neighborhood of \$12,000, and to contain a large hall with stage and dressing rooms, supper or banquet hall, kitchen, ladies' rest room and other desirable features which should prove a great benefit and convenience to everyone in the community.

The Elks Lodge will be pleased to receive letters from anyone interested, stating which of the proposed sites is, in the opinion of the writer, the most suitable and the reasons for the choice made. All communications are to be addressed to the Secretary, Carbon Lodge No. 195, B.P.O.E., Carbon, Alberta, and will be read at the meeting on February 7th, on which date it is hoped a definite decision will be made.

R. B. Wilkinson of Olds, was a Carbon visitor on Monday.

See S. F. Torrance for your 1929 Automobile license plates.

Why Teachers Get Married

Question—What are glaciers?
Answer—Guys who fix windows when they are broken.

Question—What is a peninsula?
Answer—A bird that lives on icebergs.

Question—What is a volcano?
Answer—A mountain with a whole in the top. If you look down you can see the creator smoking?

Question—Why does a dog hold out its tongue when running?
Answer—To balance its tail.

Question—What is steel wool?
Answer—The fleece of an hydraulic ram.

Question—What are Christian nations?
Answer—Those who use cuss words.

Small Boy—Father, how do they catch lunatics,
Father—With face powder, beautiful gowns, pretty smiles and soft words, my son.

He—Pardon me that I forgot to appear at your party.

She—Oh, weren't you there?

Doctor, I wanted to try a new cookery recipe, and my husband said I was to try it on the dog first.

Wasn't that cruel?

"Yes, I thought he was fond of animals."

FARMERS URGED TO SECURE SEED OATS

Farmers throughout the province are being advised by the Provincial Department of Agriculture to make the necessary provision for securing the supply of oats for seed, which they will require for their 1929 crop. The effects of frost in a number of districts are reflected in a reduction in the germinating quality of a great many of the oats threshed and in a number of cases, supplies of oats suitable for seed will have to be shipped in. Elevator companies have expressed their willingness to assist in the distribution of good seed and the farmers are advised to communicate with their local elevator agents as early as possible in order to obviate the possibility of a scarcity occurring during the seeding season.

After experiencing some difficulty in getting the transfer of the Carbon-Alma-Calgary Bus Service, Fred Poxon has at last made the necessary arrangements and has officially taken over the Bus. He will operate on the same schedule as that of the former owner, and will run a daily service to and from Calgary.

The Musical Eckardts, Swiss Bell Ringers and variety entertainers, will appear at the Farmers Exchange hall on Wednesday evening, January 16. The Co. includes several new performers since their last visit here three years ago and they promise an entire change of programme. The Company's orchestra will furnish music for dancing after the performance.

The Family Herald and Weekly Star of Montreal holds a record for subscribers renewing voluntarily and continuously year after year. After all it is not surprising when one considers the quantity and quality of the readers are given each week and at a price ridiculously low—\$1 a year or three years for \$2.

LITTLE ITEMS OF LOCAL INTEREST

Mrs. McClure and son, Nelson, went into Calgary on Monday.

Mrs. Jas. Ramsay was a Calgary visitor on Thursday last.

W. W. T. Calve left last week to spend a few weeks with his daughter in Portland.

Lady Barber and Marceller will be at the White Lunch cafe continuously. Make your appointments at the local telephone office.

Mrs. T. J. Ramsay was a visitor to the city last Friday and returned on Saturday.

Harry Poxon was also a Calgary visitor on Saturday.

Miss Connie Neville was a Calgary visitor on Tuesday and returned the same day.

Mr. Albert Wright returned to the University of Alberta on Friday. Bert is taking his final term in Medicine.

L. G. McQuade was a visitor to Calgary on Tuesday.

Alex Davis is "down" with the flu.

Mr. and Mrs. R. J. Fairbairn and family moved into Geo. Tutt's house on Tuesday.

Mrs. Greenan is up again after several days' illness with the flu.

Don't forget to look over the bar-bains that C. W. Gray has advertised in this issue of the Chronicle.

Miss Daphne Nash returned to Calgary on Sunday, to resume her studies at the Garbutt Business College.

Better Health In 1929

A year or two after the close of the Great War, and when it was organizing its peace programme for "the improvement of health, the prevention of disease, and the mitigation of suffering," the Canadian Red Cross Society launched a monthly magazine for the purpose of arousing public interest in the matter of individual, community, and national health. With the end of 1928 publication of this little periodical ceased, and in announcing the cessation of publication, the Red Cross stated that in the intervening years the subject of health improvement and disease prevention had made such giant strides, and so many organizations and publications were devoting their energies to the subject, while almost every daily and weekly paper regularly printed health articles, that the same necessity did not exist for the Red Cross magazine, consequently the money it cost to produce could be devoted to other purposes.

There has certainly been a gratifying increase in public interest in health matters in the years following the war. With all its awfulness, tragedy and enormous loss, the war at least served the purpose of advancing the cause of health. Today, Canada is probably the healthiest country in the world, but, even so, there is still vast room for improvement, and that improvement cannot be brought about alone by medical men, governments, hospitals, and health organizations. It rests largely with the individual.

In the past it has been true to a great extent that people only became actively interested in their health when they became sick, notwithstanding the fact that every intelligent person will frankly admit that prevention is better than cure. In all industry in this age special efforts are directed at the elimination of waste and all unnecessary costs in business. Yet loss of time, loss of efficiency, loss in production, loss of earnings by the employee and of profits by the employer, loss occasioned by increased expenses at the very time when income is decreased or stops, is the direct result of sickness. It is the cause of the greatest aggregate loss in our national life.

No better New Year resolution can be made, or observed, by the individual, or the community, than one which finds expression in a determination to safeguard health. Such a resolution finds added force at this particular time when an epidemic of influenza is again sweeping the continent, although, fortunately, of a milder type than those of some years ago. Influenza is very contagious, but, on the other hand, it can be easily combatted through the taking of very simple precautions. If it is not so combatted at its inception, it may quickly result in serious complications such as bronchitis, intestinal trouble, or pneumonia.

All health authorities are alive to the danger; so, too, are the life insurance companies, and all are engaged in extensive publicity campaigns to acquaint people of the danger and to make known to them the simple precautions they should exercise. Thousands of dollars are being spent in newspaper advertising and other forms of publicity, and it is money well spent, but it will, nevertheless, be largely wasted unless the masses of the people to whom these appeals and advice is directed profit by it.

This new year of 1929 cannot be a happy, prosperous year if sickness enters the homes of Canada, followed by death carrying off loved ones, or leaving members of the family weakened and liable to contract other forms of disease. Good health is the first essential to happiness. Without it no person, community or nation can be prosperous.

The Canadian people cannot render better service to themselves and their country than by giving immediate and constantly continuing attention to their health. By so doing they will be laying the only sure foundation to happiness, prosperity, progress.

League Of Nations

Coast To Coast Membership Drive To Take Place In April

The weekly and daily newspapers of Canada are warm supporters of the League, it was stated at the regular monthly meeting of the League of Nations Society held in Ottawa, when arrangements were discussed for the membership drive to take place next April. Throughout the length and breadth of the Dominion, it was said, editors have shown an interest in the activities of the League of Nations and in the efforts of the Society to promote it in this country. The support of the press will prove a great asset in the annual "Coast to Coast" Membership Drive due to take place on April 16th, 1929, which will be known as "League of Nations Day."

Missionary (to cannibal)—I warn you in regard to eating my brother. He will give you indigestion. He never agrees with anybody.

Stern Wheel Steamboats

Last Of Picturesque River Boats Has Disappeared In E.C.

The Fraser River has seen the last of its picturesque stern wheel steamers which until now have formed a link with the romantic past, the Cariboo gold stampede and other notable events in the early history of British Columbia.

The old steamer Skeena has been sold as a cannery tender, and will be used as a bunkhouse for fishermen. She will no longer navigate the shallows and treacherous canyons of the mighty Fraser, and she was the last of her line.

Stern wheelers first commenced to operate on the Fraser in 1859.

Every careful and observant mother knows when her child suffers from worms. She also knows that if some remedy be not speedily applied much harm will result to the infant. An excellent preparation for this purpose is Miller's Worm Powders. They drive worms from the system and set up stimulating and soothing effects, so that the child's progress thereafter is painless and satisfying.

Maud—"So you married your employer. How long did you work for him?"
Myrtle—"Until I got him."

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Happiness is not in getting what you want, but in not wanting what you can't get.

Grand Champion Steer

Alberta Steer Is Sold For a Net Sum Of \$1,250

A new record was set for Alberta in the disposal of MacKenzie Brothers, of Lacombe, of Earl Marshall, the steer which recently won the grand championship at Vancouver, for a net sum of \$1,250. This steer, which was bred by a Prince Marshall bull, owned by S. Henderson of Lacombe, weighed 1,250 lbs. and was purchased by Jackson Brothers, of Vancouver, at \$1 per pound—the highest price ever paid for an Alberta fed steer.

WEAK, LISTLESS GIRLS

Need Such a Tonic As Dr. Williams' Pink Pills To Restore Health

When a girl in her teens becomes pale and sallow, especially if at the same time she shows inclination to tire easily, a listlessness and inattention to her work or studies, she needs Dr. Williams' Pink Pills, a tonic which directly and specifically corrects the condition from which she is suffering. A chemical analysis of the blood of such a girl would show it to be deficient in just the elements Dr. Williams' Pink Pills can supply. But an analysis of the blood is not needed—the physical signs are a pallor of the cheeks and lips, dark circles under the eyes, easily tired and breathless after slight exertion. Poor appetite, headaches, and sometimes fainting spells follow; often the patient is nervous and is startled at the least noise. In all run-down conditions there is no other tonic will build you up so quickly and so surely as Dr. Williams' Pink Pills. The statement of Miss Dorothy Lumbkin, Bush Island, N.S., will bring hope to other weak girls. She says:—"I wish from my heart I could persuade every person who is in a run-down condition to give Dr. Williams' Pink Pills a trial. About a year ago I was a weak girl suffering from impoverished blood and a run-down system, with many of the attendant symptoms. I had often read of Dr. Williams' Pink Pills and decided to take them, and after using six boxes I feel as well and strong as ever. Dr. Williams' Pink Pills will be my standby in the future if ever my blood needs building up again, and I shall always find pleasure in recommending them to others."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

More than 2,100 miles of motor rail postal routes were started in Germany in the past fiscal year.

Cuticura Heals Annoying Rashes

Bathe the affected parts freely with Cuticura Soap and hot water, dry without rubbing, and anoint with Cuticura Ointment. This treatment not only soothes and heals rashes and irritations but tends to prevent such conditions.

Sample Each Free by Mail. Address Canadian Depot: "Stamper, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c. Talcum 25c. Cuticura Shaving Stick 25c.

Recipes For This Week

(By Betty Barclay)

SCALLOPED CORN AND CELERY

2 cups corn (canned or fresh cut).
1 cup celery (finely chopped).
1 cup buttered dry bread crumbs.
1 teaspoon salt.
1 small green pepper chopped.
2 tablespoons butter.
1 cup hot milk.

Arrange corn, peppers, celery and crumbs in two alternate layers in a buttered baking dish. Add butter to hot milk and pour over the vegetables. Cover with buttered crumbs and bake 30 to 40 minutes. Serves eight.

RICE WITH DATES

1 cup rice.
3 cups boiling water.
1 teaspoon salt.
1 cup dates.

Wash rice and add to boiling water. Add salt and boil 5 minutes. Cook in double boiler 30 minutes. Add dates, cut in pieces, and cook until rice is tender and all the water has been absorbed. Serve hot or cold with milk or cream.

Newly Arrived Missionary: Tell me what became of the man who had this position before me?

Cannibal Chief (patting himself on stomach with reminiscent grin): He took a trip to—the interior.

Drives Asthma Before It. The smoke or vapor from Dr. J. D. Kellogg's Asthma Remedy gives asthma no chance to linger. It eradicates the cause. Our experience with the relief-giving remedy shows how actual and positive is the success it gives. It is the result of long study and experiment and was not submitted to the public until its makers knew it would do its work well.

Canada's Dairy Herds

One million, four hundred and ninety thousand, three hundred and forty cows supplied milk to creameries in Canada during 1926.

Seize Russian Peasants

Frontier Guards In Poland Arrest Starving Peasants Seeking Food

Reports from the northern part of the Polish Russian frontier state that Polish frontier guards have been seizing Russian peasants who seek to penetrate Polish territory to get flour and fats in Poland.

The peasants are quoted as begging the Polish guards to permit them to obtain food in Poland in view of scarcity in Russia, adding that they have great trouble in obtaining permission to cross the frontier inasmuch as the soviet authorities feel that the peasants discredit the government by seeking food in a neighboring country.

She: "A fortune teller says I have a lot of money coming to me."

He: "It may be true, it may be—but I would rather hear a paying teller say that."

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

What She Reduced

Robert: "I'm never going to take Miss Townsend out to dine again. Too expensive."

Calvin: "Why, she told me she was reducing."

Robert: "She was. She reduced my bank-roll about 15 bucks!"

For frostbite use Minard's Liniment.

You may have more than you need, but you never have more than you want.

WINDOLITE

The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W. TORONTO, ONT.

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer. Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

ECONOMIC LIFE OF GERMANY IS REPORTED SOUND

Berlin.—Confidence in Germany's economic soundness is the dominant note in Agent-General Seymour Parker Gilbert's report for the fourth reparations annuity year made public Tuesday.

The report paints a complimentary picture of Germany's entire economic life. The agent-general testifies to Germany's punctilious payments of all sums due on the reparations accounts and describes Germany as placing the product of her science, skill and labor at the disposal of creditor nations in an effort to pay for the war.

With reference to payments for the current annuity year the report forecasts that "no question can fairly arise, in the light of practical experience thus far, as to the ability of the reich to provide the full amount of its standard contribution of the plan."

The report states that the payments and transfers during the year amounted to 1,739,000,000 gold marks (about \$440,000,000).

The report proceeds to show that the total annuity of the fourth year was almost one and three-quarter billion marks, of which France receives more than one billion (about \$250,000,000).

The list of creditors included France, Great Britain, Italy, Belgium, Jugo Slavia, United States, Rumania, Japan, Portugal, Greece and Poland.

Langsner Leaves Canada

Man Who Investigated Ambrose Small Case, Has Gone To West Indies

Toronto.—Dr. Adolph Maximilian Langsner, who investigated the Ambrose Small case here, some weeks ago, has gone to the West Indies, and later will go to Mexico. These sections are presumably more sympathetic to his theories and methods than Canada, whose authorities, according to his own statement, exhibited a disinclination to renew his immigration permit as a visitor in this country.

As on his previous departure from Toronto, he promises to return, make sensational disclosures regarding the Small case, and "solve the mystery in spite of all they can do."

Influence was brought to bear by his enemies and opponents in the Small case, he said, before his departure, with the object of preventing him continuing his investigation of the mystery.

Was Pioneer Railroad Builder

Pat Welch, Well Known In West, Dies In California

Spokane, Wash.—Pat Welch, 70, member of the firm of Stewart and Welch, railroad builders, died recently at Coronado, California, a telegram to relatives here said. Mr. Welch, who had gone to California for his health last summer, had been ill for nearly four years.

Associated with Major General John Stewart, of Vancouver, B.C., Welch had a part of the construction of many railroads in the north-west with General Stewart, held many contracts in the United States, Canada, Great Britain and Africa.

Famous Analyst Dead

Ottawa.—Dr. Anthony McGill, M.A., B.Sc., LL.D., F.R.G.S., formerly chief Dominion analyst, is dead at his home in Berkeley, Calif., according to word received in Ottawa by relatives. His death occurred on Saturday, December 29. He was 81 years old. Dr. McGill was one of Canada's most prominent chemists and was an outstanding figure in scientific circles.

New Air Marshal Appointed

London, Eng.—Sir John Maitland Salmon, air marshal, has been appointed chief marshal of the Royal Air Force in succession to Sir Hugh Trenchard, who resigned December 20. Sir John Frederick Higgins, air vice-marshal, will be promoted to Sir John Salmon's rank.

Two Opposite Camps

Difference Of Opinions Within the Ranks Of Salvation Army

London, Eng.—For the first time both parties within the Salvation Army have openly admitted that the high council which will meet shortly was composed of two opposite camps.

Officials at the international headquarters and at the headquarters of Evangeline Booth, head of the Army in the United States, freely made pronouncements on the probable line-up of voting when the question of removal of General Bramwell Booth as commander-in-chief, and reorganization of the Army will come up.

An official of the Evangeline Booth group stated that after a careful canvass the group was satisfied more than the necessary three-quarters majority of the council will vote for the removal of General Booth and subsequent reorganization.

At international headquarters those who are supporting General Booth refused to concede a possible victory to the other camp, saying that they were sure of at least seven votes, and that they believed the council would vote confidence in the general to continue his leadership.

They said, however, the method of choosing a successor, and other administrative reforms, might be effected, and that even certain of those who would support the general would favor this.

Vancouver Adds To Official Population

Suburbs Have Been Absorbed By Coast Metropolis

Vancouver.—The pandemonium which welcomed the New Year also marked the beginning of a new Vancouver. This city added some 80,000 to its official population at the last stroke of 12. The hitherto separate municipalities of Point Grey and Vancouver South merged with Vancouver proper to form one metropolis with a population of 220,883, according to figures drawn up in a survey completed in December, 1927.

A local directory, however, places the total population at 277,680. According to the lower estimate, Vancouver brought in a population of 142,150, South Vancouver 45,500, and Point Grey, 33,233. Thus this Pacific gateway, which less than half a century ago was but a settlement, has reached a position where it lays claim to being Canada's third city. The next Dominion census will officially place the honor as between Vancouver and Winnipeg.

Revising Regulations On Incoming Autos

Officials At Ottawa Welcoming Opinions On Existing Restrictions

Ottawa, Ont.—Business men of Western Canada are taking an active interest in the revision of the Customs regulations in regard to the entry from the United States of automobiles.

The Department of National Revenue has been engaged for some time in this re-drafting of these regulations with the purpose of removing objectionable restrictions on incoming autoists, and such has been the interest of business men in the west that the work has been delayed temporarily until all representations have been received.

Many board of trades have written to the department, and the officials are welcoming every expression of opinion. Every effort will be made to so redraft the regulations that they will be acceptable.

New Hotel Is Assured

Saskatoon, Sask.—Definite assurance of construction of a new C.N.R. hotel, consistent in size and character with the needs of the city of Saskatoon, was contained in a telegram received by Mayor G. W. Norman, of Saskatoon, from Sir Henry Thornton, president of the Canadian National Railways.

British Members Nominated

London, Eng.—The British government has nominated Sir Josiah Stamp and Lord Revelstoke as the British members of the projected committee of experts on reparations. The names of the two deputy members will be announced later.

HEADS NATIVE SONS

Dr. James Cotton, president of the Native Sons of Canada, who express fear that Canada's new immigration agreement with Britain may bring too many settlers here, thereby increasing unemployment and driving Canadians to the United States.

Prisoners Help Fund For Distressed Miners

Heard Appeal Made By Prince On Christmas Day

London, Eng.—Evidence is fast accumulating of the added impetus given the lord mayor's fund for relief of families of distressed miners by the personal appeal of the Prince of Wales broadcast by radio on Christmas Day. The fund now amounts to nearly \$2,000,000 exclusive of the governmental contribution which is to double it.

The governor of a certain prison has sent along \$55 "from the prisoners who heard the Prince." Many letters received at the headquarters of the fund, the Mansion House, are addressed to the Prince personally.

Canada's Trade With U.S.

Best Customer Last Year Says Bulletin Issued At Washington

Washington, D.C.—Canada literally purchased a little of everything American manufacturers had to offer during the first ten months of 1928, and may have "bought the Brooklyn Bridge" if Uncle Sam offered such a structure for sale.

This makes the substance of "our world trade," says a bulletin issued by the foreign commerce department of the Chamber of Commerce of the United States. It stated that the Dominion was the best customer of the United States during the designated period.

FAVORITE PHOTOGRAPH OF PRINCE

Here is reproduced a photograph of the Prince of Wales which was taken from the Illustrated London News. This picture is declared to be the best ever secured of the young man who recently returned from the big game haunts of Africa to the sick room of his father, King George.

To Preserve Niagara Falls

Treaty Is Signed Between Canada and United States

Ottawa, Ont.—The construction of remedial works in the Niagara River designed to distribute the water so as to ensure at all times unbroken crestlines on both Canadian and American Falls, is provided for in a treaty between Canada and United States which was signed at the office of the Prime Minister here.

In addition to providing for the construction of these works, provision is also made that each country may divert an additional 10,000 cubic feet of water per second for power purposes. These diversions will be permitted only "during the winter or non-tourist season, beginning on the first day of October and ending on the 31st day of March of the following year."

The treaty was signed by Right Hon. W. L. Mackenzie King, acting in the capacity of plenipotentiary for his Majesty the King, and by Hon. William Phillips, United States minister to Canada, as plenipotentiary for his government.

Early Seeding

Marquis Wheat Sown At Indian Head On January 2nd.

Indian Head, Sask.—Saskatchewan in past years has been noted for the creation of records, some of them strange and unusual, and on the second day of 1929, another was added, that will stand for some time.

This was the seeding of spring wheat, five acres of Marquis being planted on an experimental plot at the experimental station farm. At 4 o'clock, the superintendent ordered his men and teams out, and according to information given Wednesday afternoon, the five acres were seeded before dinner.

The land, summerfallow, was in excellent shape, and the wheat was buried to quite a depth.

New Commander For Rangers

Ottawa.—Included in the promotions announced by the department of national defense is that of Major E. Poole to the rank of lieutenant-colonel, and to command the Rocky Mountain Rangers, with headquarters at Kamloops, B.C., vice Lieut. Col. T. Aldworth, who has been transferred to the reserve of officers.

To Tour Canada

Ottawa.—Sir William Clark, British high commissioner for Canada, next month hopes to visit Winnipeg and also Quebec, and then in the spring make an extended tour across the Dominion to Vancouver.

EFFICIENCY OF NEW COMBINES AMPLY PROVEN

Ottawa.—Contributing to the progressive transition of Canada's farming industry, one of the more recent labor-saving devices, the reaper-thresher, or "combine" is playing an important part, according to E. S. Archibald, director of Dominion experimental farms.

Latest statistics, compiled by the federal department of agriculture, show that more than \$12,000,000 have already been invested in this new harvesting machine by farmers of the prairie provinces. It is also estimated that more than 3,500,000 acres of grain were cut and threshed during 1928 by the new method.

Saskatchewan, the premier grain producing province of the Dominion, leads in the number of combines in use with a total of 2,356. In Alberta 1,095 machines were in operation, while 206 were introduced in Manitoba.

Exhaustive experiments with the combine have been conducted by the federal department. Data has also been collected from owners scattered throughout the Dominion. From this information it has been established that very little trouble is being experienced in operation of the combines and that grain kept without loss in grade or milling quality.

The survey further revealed that harvesting with combines resulted in an approximate saving of eight or nine cents per bushel. A number of owners reported a saving of grain averaging 2.96 bushels per acre and that better grades were received than for binder harvested grain. A few received lower grades, while the majority of users noted no difference.

The canvass indicated that weeds caused delays in some sections. Several operators, however, stated that burning of combine stubble and straw had rendered the succeeding crop free from weeds and in several instances had increased the yield from two to six bushels an acre.

Senate Editor To Retire

Albert Horton Quits Office After Fifty Years' Service

Ottawa.—After half a century of service, Albert Horton, editor of Senate debates in Canada's parliament is to retire shortly, it was announced recently. He will be succeeded by David Halpin, at present of the Senate Hansard staff.

Mr. Horton has been a familiar figure on parliament hill since he was brought here in 1877 by Hon. George Brown, to report the proceedings in the Senate for the Toronto Globe.

The Flu Scourge

Epidemic Most Severe In Nova Scotia and Ontario

Ottawa, Ont.—Ontario and Nova Scotia are the two provinces of the Dominion where the ravages of the flu are most severe at present, declared Dr. J. A. Amyot, deputy minister of health, but the visitation of the scourge this winter is by no means as serious as those of 1918, 1919, and 1926.

The complications which accompanied the malady in those years have not been present to such an extent in the present epidemic.

Makes Endurance Flight

Los Angeles, Calif.—A new world's endurance flight mark for feminine flyers was attained by Miss Bobbie Trout, 19-year-old Los Angeles girl, when she landed her Golden Eagle plane here, setting a new continuous flight time of 12 hours and 11 minutes.

Tempest In Japan

Tokyo.—Seven hundred houses were reported destroyed, 56 persons killed and scores injured by storms on the Hondo coast, southwest of Niigata. Information reached the railway department here that at least 20 villages were inundated by the high seas.

BUYERS AND SELLERS CAN HELP THEMSELVES

It is no good hiding your light under a bushel if you want to sell electric light shades, lamps and fittings.

The live merchant, the man who is turning his stocks many times a year, is the man who advertises.

He does not shout his business secrets to the world—he just goes right along and advertises.

Where there is no advertising there is stagnation just as where there is no moving water you will find a swamp.

The future growth of a city depends entirely on the part that its citizens take in its everyday life. A high spirit of loyalty to the home city must be developed and maintained.

All citizens should support the city that supports them.

If the business men of some communities would spend as much time fighting for business as they do fighting among themselves each individual business would be in better shape.

The person who attempts to live in a community getting out of it what he can and contributing nothing to it is a parasite. Such person is selfish and selfishness is the mother of failure.

You cannot enjoy success in a community unless the community enjoys success. Work for your town.

In store life business comes where it is invited and stays where it is well treated.

Anything that is worth having is worth advertising.

Continuous advertisers have ever increasing sales.

The store which is a good place to rest in, where they just sleep along, waiting for something to happen, is in a state of decay.

Common sense in buying means buying advertised goods from reliable home concerns.

It is better to see and feel the goods you want in a store than to gaze at its picture on highly glazed book paper.

Home newspapers go into every home and ads. are read the same as news.

Newspaper advertising brings the buyer and the seller together.

Some 200 of the thousand head of buffalo in Elk Island Park, east of Edmonton, have been slaughtered during December in order to keep the size of the herd within the carrying capacity of the park pasture. It is expected that most of the meat thus secured will be shipped north in the form of pemmican to provide food for Eskimo inhabitants of the Northwest Territories as a result of the growing demand from this source following the trial shipments made last year.

Supplies for the 150 inhabitants of the lonely little island of Tristan da Cunha in the southern Atlantic not far from St. Helena are being collected by Montreal chapters of the I.O.D.E. and will be delivered in February by the Canadian Pacific Liner "Duchess of Athol". This great liner, making a cruise of South America and Africa, is one of the few vessels to call at this isolated point. The visit is one of the unique features of the cruise for the passengers and the event of the year for the inhabitants of the island.

Teacher—If I tear a piece of paper into four, what do I get?

Pupil—Quarters.

Teacher—And if I divide it into eight?

Pupil—Eighths.

Teacher—And if I divide it into 8000 parts?

Pupil—Confetti, Sir.

Don't buy anything merely because your neighbors think you ought to have it.

.....

Usher (to cold, dignified lady)—Are you a friend of the groom?

The Lady—No, indeed! I am the brides mother.

Here and There

(173)

More than 20,000 acres of Indian lands, which include some of the best agricultural areas in the Peace River district, are likely to be sold at auction in the near future. This action will in all probability follow a survey that is being made in the north country by W. Morrison, Inspector of Indian Agencies for the three western provinces, with headquarters at Regina.

A new industry—badger farming—may be started in Saskatchewan by John Rothenberger, farmer, of Vanguard. Last spring Mr. Rothenberger caught a badger and four pups. He built a large pen, about 15 feet long and 4 feet wide. During summer he fed the badgers until they are now quite tame, and are said to be larger than any badger running wild. Their coats are in excellent condition and offers of \$18 for each skin have been received.

A new world record was set by the Canadian Pacific Railway recently when a train of grain more than a mile in length was operated between Stoughton and Arcola, in Saskatchewan. It was the longest and heaviest grain train in history, consisting of 135 loaded grain cars, each approximately 40 feet in length, a water car, a caboose and engine. The gross weight was 8,722 tons and the total contents of the cars were 202,000 bushels of grain.

The enthusiasm of the citizens of Quebec is so infectious that it is an easy matter to interest visitors in winter sports, stated J. G. Strathdee, winter sports manager of the Chateau Frontenac, in giving a forecast of this winter's programme. Skating, skiing and tobogganing will be in full swing as usual; the dog derby will most certainly take place; and the ice carnivals and storming of the citadel will probably be featured again he said. Mr. Strathdee mentioned the splendid co-operation given the winter activities at the Chateau Frontenac by the Quebec Winter Sports Association.

The number of disciples of Isaac Walton, Canadian and American, who have pried rod and reel in Canadian waters during the past season is greater than ever before, states A. O. Seymour, general tourist agent of the Canadian Pacific Railway at Montreal in announcing the winners of the Ontario bungalow camp fishing trophy competitions. Phillip Peterman of Laurium, Michigan, won the Nipigon River contest for speckled trout, Edmund Sleebart of Chicago won the French River "muskey" prize, and Theodore Klipp of Winnipeg caught the largest bass entered in the Devil's Gap camp competition.

England will have enough Canadian apples shortly to keep the doctor away for the next year, if there is any truth in the proverb, as ships sailing for the old country this autumn are carrying many boxes of souvenir apples shipped by Canadians to their friends overseas. This has been the custom for the past few years and according to J. B. Martin, manager of the foreign department of the Canadian Pacific Express Company, it is becoming increasingly popular. So great has been the demand for fresh Canadian apples each autumn for shipment to Europe that grocers throughout the country now have standard size boxes for chrome and special low rates are granted by the express company.

JANUARY HARDWARE

NOW ON SALE NOW ON

The Following List represents only a small Portion of the Sweeping Reduction I have made on all lines of Builders, Carpenters and Household Hardware away below cost. Every article in this store is greatly reduced for this Annual SALE.

ABOUT 50 GALLONS OF SHERWIN WILLIAMS MIXED HOUSE PAINT, ASSORTED COLORS, PER GALLON, REGULAR \$6.00. NOW \$4.50.

WORLD HAPPENINGS BRIEFLY TOLD

The preparatory commission for a disarmament conference has been convened to meet at Geneva on April 15.

Dr. J. D. MacLean, former premier of British Columbia, has taken an important post in the federal department of finances at Ottawa.

At a meeting of the selection committee in Winnipeg, Lawrence C. Bonnycastle was selected as Manitoba Rhodes scholar for 1929.

English "with no American tinge" will be the world dominating language, Professor R. Dybowski, of Poland stated at the Modern Language Association meet, in Toronto.

Rudyard Kipling celebrated his 63rd birthday on his estate "Batesman" and the following day joined in celebration of his wife's 63rd birthday. Both days were spent quietly.

President Emilio Portes Gil believes that prohibition would benefit Mexico but he will attempt to wean the people from alcoholic beverages by distraction and education rather than by a sudden and severe law.

A new record for grain exports was established by the port of Montreal during the 1928 navigation season, when 202,575,931 bushels were exported, an increase of 17,508,844 bushels over 1927.

The well-known London chemist, Hilton Jones, announced recently the discovery of a new gas, so deadly that it would make war "international suicide." Jones said the gas causes death instantly with the slightest inhalation.

Two new passenger steamers for the Canadian Pacific steamships night service between Vancouver and Victoria have been ordered in London. The new boats are to be delivered in 1930, and will each have sleeping accommodation for 435 passengers.

The annual Lewis gun competition of the Dominion of Canada Rifle Association has been awarded to the gun team representing "B" Company, Governor-General's Foot Guards, of Ottawa. It was announced at Ottawa. The competition was participated in by entries from units throughout the Dominion.

Powerful Medicine.—The healing properties in six essential oils are concentrated in every bottle of Dr. Thomas' Electric Oil, forming one of the most beneficial liniments ever offered to the use of man. Many can testify as to its power in allaying pain, and many more can certify that they owe their health to it. Its wonderful power is not expressed by the small price at which it sells.

Copper In Northern Canada

The deposits of copper ore in the Arctic region of Northern Canada, although at present inaccessible, possibly constitute one of the great copper ore reserves of the future.

Grindstones and Pulpstones

There are in the Maritime Provinces about seventy quarries from which grindstones and pulpstones have been furnished.

FROST BITTEN.

Relieve the pain of cold-nipped cheeks or ears with Minard's. It will soothe and heal.

W. N. U. 1767

Landing Device For Planes

Matter Is Occupying the Attention Of the Government

The construction of an efficient landing device for planes, combining skis and wheels, is occupying the attention of government aeronautical engineers. Several forms are now being tested at Ottawa, but it is admitted that the problem is still unsolved.

The difficulty is one that is peculiar to Canada, air officials stated today. Airplanes frequently take off at one point, using wheels and on arrival at the end of a few hundred miles' trip find it extremely difficult to land without skis. Air mail flights between Toronto, Montreal and the Maritimes are particularly affected.

Winnipeg Newspaper Union

Trim Graceful Lines

A sheer rayon printed velvet in harvest brown tones, practical for all-round wear, achieves new femininity through demure bow of soft faille silk crepe slipped through bound openings at end of diagonal neckline and tied in knot. The circular skirt carries out one-sided treatment in pointed outline, attached to hip, to give trim graceful line. The sleeves are dart-fitted. It's easily made and at an attractive cost, for the 36-inch size takes but 3 yards of 40-inch material with 1/4 yard of 27-inch contrasting. Style No. 339 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Plain transparent velvet in golden brown is captivating for afternoons. Crimson red georgette crepe is enchanting for afternoons and informal evenings. Black rayon velvet is dignified for dining out. For all-round wear, select black lustrous crepe satin or navy blue wool crepe. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

How To Order Patterns

Address: Winnipeg Newspaper Union,

Town

"Well, Jim," asked the returned traveller, "have you married that sweet girl, or do you still darn your own socks?"

"Yes."

One of every 2,000 children in England is affected by word blindness or the inability to read and spell.

SUNDAY SCHOOL LESSON

JANUARY 13

SIN

Golden Text: "If we say that we have no sin, we deceive ourselves, and the truth is not in us. If we confess our sins, he is faithful and right, to cleanse us from all unrighteousness."—1 John 1:8, 9.

Lesson: Genesis 3:1-24; 6:5-8; Mark 7:14-23; Romans 1:18-32; 3:10-18; 1 John 1:5 to 2:6.

Devotional Reading: Psalm 51:1-10.

Explanations and Comments

What God Is, and What We Should Be, 1:5, 6. The message which John had received from Christ (see verses 1-3), and which he now hands on, is that God is light, and in Him is no darkness (moral darkness, i.e. sin) at all. "Light, as here contrasted with darkness, means not intellectual illumination, but ethical perfection. It describes the absolute purity and holiness of God as he has been revealed in Christ."—A. S. Peake. God is spirit (John 4:24); God is light (1 John 1:5); and God is love (1 John 4:8). "Spirit, light, love are not mere attributes, they are Himself. They are probably the nearest approach to a definition of God that the human mind could frame or comprehend. The more we consider them, the more they satisfy us. The simplest intellect can understand their meaning; the subtlest cannot expound it."—A. Plummer.

It is not possible to live in sin and at the same time to enjoy the fellowship of God. John next declares. "Walk" in this verse 6, is a familiar figure of speech, meaning one's customary conduct. "Do not the truth" means do not live in harmony with the demands of truth. "The life as well as the statements of the lips are false."

"A life in moral darkness can no more have communion with God, than a life in a coal-pit can have communion with the sun."—A. Plummer.

The Atonement For Sin, 1:7.—If we walk in the light, as He is in the light (we walk); God is; we move through space and time; he is eternity, we have fellowship one with another (the nearer we are to God, the closer is our fellowship with one another).

"While we walk with God in light, God our hearts doth still unite; Dearest fellowship we prove, Fellowship in Jesus' love."—Charles Wesley.

Grippe! Flu! Influenza! Raging Through Canada

Preventive measures are advisable with so much Grippe in the air. Keep the throat and nostrils clear of infectious germs by inhaling the balsamic vapor of Catarrhazone. By this means you send the healing and soothing properties of the famous 'Blue Gum of Australia' all through the air passages of the head and throat.

Catarrhazone stops a grippery cold, it's splendid for irritable throat, relieves headache and quickly drives out the germs of Flu, Influenza, Grippe and Bronchitis. Get Catarrhazone today. Complete outfit, \$1.00, and lasts two months; smaller size 50c at all druggists.

More Effective Danger Signs

A. Houston, Texas, sign says our danger signs are based on the wrong psychology.

Tell a man to "Stop, Look, Listen" and he is impelled to do none of the three.

It suggests the following railroad crossings:

"Come ahead. You're Unimportant."

"Try our engines. They satisfy."

"Don't stop. Nobody will miss you."

"Take a chance. You can get it by a train only once."

Excellent For Croupy Children.

When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

Visitor (surveying room): "This is—er—hardly what I was led to expect from your advertisement."

Landlady: "Well, you ain't the gentleman I thought you was from your letter."

Always keep Minard's Liniment handy.

"Cheer up, old man," said the optimist. "Things aren't as bad as they seem."

"No, but they seem to be," groaned the pessimist.

To Check Flu-Grip

Fight the Germs with Vapors

Before They Can Get a Start

Treat All Colds Promptly But Be Careful Not to Disturb the Digestion With Too Much Dosing

While Flu is so prevalent everyone should take precautions to prevent its further spread. Flu is generally accompanied by a headache, burning eyeballs, and aching joints. But it begins so many times with just an ordinary cold.

Too often, the colds are neglected until they have lowered the vitality and permitted the lurking germs of influenza, or pneumonia to "get a foothold."

The only safe plan is to attack a cold at the very start. A hot bath, a laxative, and a vigorous application of Vicks VapoRub on the throat and chest at bedtime, will usually break up a cold overnight.

External Treatment Best

For hours after Vicks is applied, its ingredients, time tested remedies, such as camphor, menthol, eucalyptus, thyme and turpentine, are vaporized by the warmth of the body, and inhaled right to the inflamed air passages. At the same time, the ointment acts

through the skin like an old-fashioned poultice, "drawing out" tightness and pain, and helping the vapors to break up the congestion.

Avoid Upsetting Stomach

This simple external treatment cannot disturb your digestion as too much "dosing" is so apt to do. This is doubly important when "flu" is around, for your stomach, as well as your respiratory organs, must be kept in good condition in order to keep your body resistance at its highest level.

For this reason, too, mothers prefer Vicks for children. It can be used freely and often, even on the youngest child, with no fear of upsetting a delicate stomach.

To Help Ward Off the Flu

When influenza colds are prevalent, you can often prevent infection by snuffing a little Vicks well up the nostrils every night and morning, or before exposure to crowds.

OVER 17 MILLION JARS USED YEARLY

Two Hundred Mile Dog Derby Returns To North Country

Famous Mushers Will Race This Year From The Pas To the Flin Flon

After a lapse of four years, the endurance dog derby, which once thrilled the north country, and, it might even be said, the world, is returning to The Pas. The gruelling non-stop race which brought fame to Northern Manitoba and its hardy mushers will be revived at the frontier town's winter carnival, March 4 to 7. This time, romance will be added to romance. The course will be from The Pas to the famous Flin Flon mine and back, a distance of 200 miles.

Two thousand dollars in cash prizes, besides other valuable awards, and the Walter Goyne-Grant Rice memorial cup, which has an intrinsic value of \$1,000, will attract mushers from wherever mushers mush. The winner will have the dog racing championship of the world.

"Shorty" Russick, veteran driver, and the youthful, though none the less noted Emil St. Godard, present world's champion, each have a leg on the memorial cup. St. Godard will be one of the leading contestants this year, and it is likely that Russick will also enter. Other noted mushers are bound to make a strong bid for more fame at the derby since it has gone back to epic proportions. Seppala, Alaska's pride, has been itching for another endurance race, his friends say, and other mushers, from both the east and the west, have already sent in their applications for entrance forms.

Drivers are already training their teams for the test in March. St. Godard's dogs are in fine shape after a summer and a fall of workouts. The team of the French-Canadian musher had been trained for the speedier, 120-mile lap races of the last three years, but Emil claims that the dogs have the endurance for the longer route. They have been harnessed to an auto chassis in the warm months and are in good condition for the snow trail.

All the color, the lure, the joys and the sorrows of the land of the northern lights is crowded into the romantic history of dog racing at The Pas.

Hockey players use Minard's Liniment.

Ward Heeler—You promised me a job.

New Mayor—Well, I told my secretary to give you one.

Ward Heeler—But he wanted to put me to work!

Testing Canada's Fuels

The Department of Mines has erected in Ottawa a new Fuel Research Laboratory building, which has been equipped with modern instruments and machinery for conducting extensive research on Canadian fuels—solid, liquid, and gaseous.

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach; drive out constipation and indigestion; break up colds and simple fevers and promote healthful refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe, as they are absolutely guaranteed free from opiates or any other injurious drug.

Concerning the Tablets, Mrs. Alex. J. Perry, Atlantic, N.S., writes:—"I always keep Baby's Own Tablets in the house for the children, as I have found them a perfect medicine for little ones."

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

The cheapness of Mother Graves' Worm Exterminator puts it within reach of all, and it can be got at any druggist's.

"Say, pa?"

"What is it?"

"If every day will be Sunday by and by, what will every other day be?"

Love is the thing that makes a fellow want to pay a girl's board bill when he can't pay his own.

"I have been all round and cannot get a car anywhere."

"Have you tried the ditches?" — Pages Gates, Yverdon.

CHAPTER XI.—Continued

For hours Donald followed the expert through the mill, while the latter explained and tested the different motors.

Once a week Robert Rennie came to the mill, taking a keen interest in all phases of its construction, and invariably he went away with a pleased smile on his face.

"Never saw the old man so worked up," commented Gillis. "Guess he'd like to come up here and run her himself."

Rennick was still skeptical. For no apparent reason he had taken a dislike to Donald. "It's just 'cause you and I are such good friends," explained Gillis. "Me and him get on like a couple of strange bull-dogs."

When the huge three-storied mill, with its dry kiln, lumber skids, conveyor shed and railroad spurs, was ready for operation, and each machine had been tested, Robert Rennie arrived with other officials of the company. Next morning Donald's heart thumped as the mill's big whistle sent out its first call to work and the men filed eagerly to their posts.

The logs were sprayed with huge water-jets as they came up the chain-haul to clean them of gravel and debris. The electric "nigger" spun them about and threw them into place with a thud that shook the mill. Then in a wild crescendo of sound there rose the harsh chorus of saws: the singing howl of the cut-off, the strident, slurring sound of the gang-saws, and the staccato snarl of the trimmer.

Smiling and rubbing his hands, Robert Rennie walked through the mill. "Running like a greased pig," shouted Gillis above the clamour. The owner of the R. C. & L. Co. so far forgot his decorum as to slap the astonished Gillis heartily on the back.

Donald noticed an ever-increasing irritability on the part of the logging foreman during the next week. The erstwhile jocular Gillis became sulky

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed.

After trying many treatments, in vain, I at last decided to try

and in a surprisingly short time they did me much good.
Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

W. N. U. 1767

and morose. Donald got an inkling as to the cause of his friend's gloom when he heard Gillis in conversation with Andy.

"What the hell's the matter, you big lunkus? You're like a bear with a sore foot," complained Andy.

"If my gang don't get here pretty soon, and I have to put up with this crowd of bohunks much longer, I won't be fit to live with," growled Gillis.

Gillis's gang of "redshirts" were known the length and breadth of British Columbia. Employers bid high for their services, but for many years they had stuck loyally with Gillis and the R. C. & L. Co. At present they were employed by the Company in one of their camps up the coast, but at Gillis's earnest request, Robert Rennie had promised to send them to Summit Lake.

Gillis's "redshirts" had the well-earned reputation of being the wildest crew of lumber jacks west of the Rockies. "They're wild, all right," Gillis had admitted; "a swearin', drinkin', fightin' gang of roughnecks. But holy mackerel! How them boys can log!"

That night Gillis confided his troubles to Donald. "I don't know what in tarnation's to become of loggin' in years to come if things keep on as they are now," he began in a despondent tone. "It used to be that when you sent down town for loggers you got loggers. But now, with a gesture of disgust, 'you git a lot of silk-stockin'd, mandolin-playin', gum-chewin', smooth-haired guys, or else a bunch of snuff-chewin', garlic-smellin', macaroni-eatin' bohunks, whose names sound like a war in Central Europe.'"

Sighing reminiscently, he continued: "I often wonder if it's because I'm gettin' old; but, you know, when I look back on the days, when we logged with bull teams, it seems to me that the men at that time liked to work. I can still see the old timers in their whiskers, and their big black hats and flannel shirts, as they sailed out on the old Comox or the Cassiar. He shook his head sadly. "Ah! there was only one kind of logger in them days."

Seeing that Donald was interested, he went on: "Yes, there's two kinds of loggers nowadays, Donnie, the 'single-breasted' and the 'double-breasted.' And there's a hell of a lot of difference between the two. The 'single-breasted' logger is a man that don't speak anythin' but English, an' he don't belong to the 'I won't work' neither. He knows loggin' from A to Z; don't mind sleepin' in a bunk, and always carries his own blankets. If he borrows a ten-spot off you, as soon as he earns it he comes lookin' for you, slips you the money, grabs you by the hand, and lookin' you straight in the eye, says, 'Thanks, friend, come and have a drink.' At night, when he is through work, he'll smoke his pipe, grind his axe, talk about the next day's work with the boss, read the paper and go to bed. In the mornin' he'll swallow a big load of prunes and ham and eggs and go to work a-singin'."

"But this 'double-breasted,' he snorted disgustedly, "he's a mixture of a taxi-driver, bartender and soap-box orator, and just because he lives in B.C., he thinks he is a logger. He knows the difference between a fallin' saw and a buckler's saw, and that just about lets him out. If he borrows a dollar off you, the minute the bill slips out of your hand you can see a look in his eye that says, 'You're hooked.' And the devil of it is that he won't cross to the other side of the street when he sees you comin', but he'll walk right up to you a-smilin' and ask you for another buck."

"When he gets through at night he cleans his finger-nails and picks on a mandolin while he tells how many Janes is stuck on him in Vancouver; gives an opinion that the shower-bath was not hot enough, and how we sufferin' workers should rise against the capitalists. He'll kick at the breakfast table because there is only oranges and no grape-fruit. When he goes in the woods he'll throw a few tools away so's to help the cause of the workers."

"Workers!" he exploded, as he came to his feet and walked the floor, "we've got too many 'double-breasted' and 'hunks' in this camp right now, Donnie. A hunk will work if you show him a pick and shovel, but these other guys are trouble-breeder. Did you see that big brute that came in today?"

Donald remembered seeing an enormous man with narrow, piggy eyes, in the crowd of men sent by the employment agency.

"That's ol' Hand. He's a bad egg. I s'pose I'd ought to fire him, but he's a good logger, and they are mighty scarce 'round these diggin's." He yawned sleepily. "Got to fix a 'spar-tree' for a 'high-lead' tomorrow, so I better hit the hay."

Preparing the "spar-tree" for "high-lead," or "sky-line" rigging, is the most spectacular and thrilling performance in the logging industry. A standing tree is trimmed of top and branches, then strengthened with guys. With the pull coming from this altitude, the advantage over the straight ground pull is enormous as logs are lifted high in air over all impedimenta. The men who do this hazardous work are known as "high-riggers."

Next morning, a man with a short-handled axe, wearing a wide belt to pass around the tree-trunk, and a pair of linemen's spurs, slowly climbed a big fir. As he ascended he trimmed the trunk clear of limbs. Quite a crowd gathered, among them the trapper, with his rifle on his arm.

"I ain't got a 'high-rigger' in the outfit," growled Gillis. "This feller agreed to trim her, but he says he never chopped the top off one, so I guess we'll dynamite her."

The explosive, with a detonating cap, was tied around the top of the tree and wires strung to the ground. For some reason the batteries would not act, and Gillis chafed under the delay.

"I kin set her off for ye," said the old trapper.

Gillis turned to him. "How?" The trapper tapped his gun. "Put a piece of paper on the cap so I kin see her and I'll pop it."

"That's a new one on me," laughed Gillis.

He sent the man aloft to place a square piece of pasteboard on the cap. The men moved back from the foot of the tree, and Gillis gave the signal that all was clear. The old man sprang briskly to the top of a stump, tipped his big hat to the back of his head, and raised his rifle slowly. For an instant the long barrel wavered slightly, then steadied. The report of the rifle was drowned by a splintering crash. The heavily-branched top lifted, then came hurtling through the air to strike the ground a mass of wreckage. For a moment the big spar swayed drunkenly from the shock, then stood stark and rigid. Deprived of its fronds of green, it appeared a ghastly relic of its former self.

That afternoon, as they waited the arrival of the train, Gillis talked again of his "red-shirts." "White men, every one of them," he declared proudly, "and everyone of them with a nickname that is known all over the Coast. Ye just ought to see my two 'high-riggers,' 'Hoop-la' McKenzie and 'Blackie' Anderson. 'Blackie' is as black as an Indian, and 'Hoop-la' got his name from standing on the top of a spar tree, after he cuts her off, wavin' his hat and yellin' 'Hoop-la'."

"I got five Jack McDonalds in the gang. Their names are 'Sly' Jack, 'Fightin' Jack, 'Check-Book' Jack, 'Johnnie-On-The-Spot', and 'Crazy' Jack. An' if they had all bin named 'Crazy' Jack it wouldn't bin no mistake," he finished with a laugh.

The train rumbled to the station and the usual crowd of workers came pouring from the cars, while a crowd stood waiting to board the train. It was the same every day—men coming and men going.

Gillis uttered a glad cry, "Here they are!"

A big, ostentatious man, with broad shoulders and narrow hips, stepped to the platform. His dress was truly colourful and striking—with hat, high boots, a vivid scarlet shirt, with a cloth belt of the same bright hue tied at the side, the ends dangling loosely.

"Get out of the way, hunkies, and make room for a logger!" he roared, as he elbowed his way through a crowd of scattering foreigners, behind him a line of men clad in the same brilliant attire.

"Hello, Hoop-la! you ornery ol' skate!" bellowed Gillis.

The big man turned. "Here he is fellers!" he shouted.

In a moment Gillis was surrounded by this picturesque crew, howling tumultuous greetings.

"Hello, ol' hoss!"

"Hello, you son-of-a-gun!"

"How the hell are ye?"

Donald was subjected to crushing handclaps as he was introduced to each and every one of this crowd of husky loggers.

As Donald studied them he did not wonder at Gillis's pride in these men. With the exception of Blackie, there was none under six feet in height, and they carried themselves with a loose swing that was almost a swagger. Many of them were well past middle age, some quite grey about the temples. They were all filled with the sparkling health of the great outdoors, their skins the colour of mahogany.

TOOTH EXERCISE

You have read considerable of late about the "daily dozen," and other such setting-up exercises.

So you know, of course, that the body requires exercise if it is to develop and keep fit.

You have been told, too, that a vigorous chewing of your food is both beneficial and necessary as the first step in good digestion.

But perhaps you have never given thought to the beneficial effects of thorough mastication on the tooth structures themselves.

In the first place, then, there is the stimulating effect on the supporting structures of the teeth, giving them proper "tissue tone."

In the growing child, the development of the teeth, is impossible without sufficient masticatory exercise.

Former generations ate hard and coarse foods, and suffered little from dental trouble.

Mastication of such tough uncooked food gave to their teeth and jaws sufficient exercise to promote the most vigorous circulation and a very decided massage of the gums. These agencies through the abundant blood supply to the jaws provided ample tissue nourishment for growth and development along with great powers of resistance to infection.

Today, we are using a great many over-refined and pre-digested foods, which require little or no chewing, and in the use of which, even the mechanical effects from the scrubbing of the tooth surfaces are lacking, with the result that Nature working out her inexorable law, that a member that is not functioning as intended, gradually loses its efficiency, is making the tooth structure softer and less resistant to disease.

There should be, therefore, an habitual use at each meal, of foods selected not only on account of their nutrient qualities, but because they are of such a nature as to require vigorous masticatory effort.

A Berlin husband advertises his matrimonial troubles in a local paper: "My pious, faithful wife has departed from me. Will the honorable finder please keep her?"

Little Helps For This Week

"Freely ye have received, freely give."—Matthew x. 8.

The Hand that strews the earth with flowers,

Enriched the marriage feast with wine;

The Hand once pierced for sins of ours,

This morning made the dew-drops shine.

It freely gives its very best.

Not barely what the need may be,

But for the joy of making blest;

Teach us to live and give like Thee.

Not narrowly men's claims to measure,

But daily question all our powers,—

"To whose cup can we add a pleasure,

Whose path can we make bright with flowers?"

—Elizabeth Charles.

Opportunities come reaching out their hands to us every moment, not to do great things perhaps, but for the "Little, daily, unremembered acts of kindness and of love," that take off the chill from our undemonstrative matter-of-fact intercourse with one another, and keep our hearts from starvation.—Lucy Larcom.

A Valuable Document

Every Person Likely To Need Birth Certificate At Some Time

Do not allow a child to grow up without having a birth certificate safely tucked away for possible future contingencies.

Some day the child may wish to vote in a State far removed from that of his birth; he may wish to prove that he is of working or marrying age; he may desire to travel abroad. In fact, dozens of contingencies may arise that will shout loudly for a birth certificate.

The baby cannot secure his own. It is a wise father or mother who sees that this necessary duty is performed for him long before the time arrives when he may cry out for it.

One hundred dollars monthly invested at six per cent. compound interest will grow in 25 years to \$62,977.15.
